All data is at 20°C coil temperature. Force (torque) outputs degrade with elevated temperatures.

1. Gross starting torques are shown. For net available starting torque, subtract return spring torque of 0.75 lb.-in. ±20%.
2. Holding torque is shown at the stabilized temperature of 105°C and continuous duty.

* Consult factory.

### How to Order

1. Using the Performance Chart to the left, select one of the five columns which provides the appropriate duty cycle for your application. Reading down this column locate the torque for the stroke you need. For net available starting torque, subtract return spring torque of 0.75 lb.-in. ±20% (if torque is insufficient go to next larger solenoid size).
2. Use the chart below to select the model number corresponding to your desired design, stroke and direction of rotation (as viewed from armature end, opposite mounting studs).
3. Using the Specification Chart to the right, select the same duty cycle column. Follow down the column into the VDC ratings. Select the voltage which most closely matches your supply voltage. Read across to the left to select the coil awg suffix.
4. Replace the last two digits of the model number (XX) with the coil awg number to complete the part number.

Please see www.ledex.com (click on Stock Products tab) for our list of stock products available through our North American distributors.

## General Specifications

### Dielectric Strength
- 23-29 awg, 1200 VRMS
- 30-33 awg, 1500 VRMS

### Recommended Maximum watts dissipated
- Maximum watts dissipated by solenoid are based on an unrestricted flow of air at 20°C, with solenoid mounted on the equivalent of an aluminum plate measuring 15 1/8” square by 1/8” thick.

### Minimum Heat Sink
- Recommended Maximum watts dissipated: Watts dissipated is shown.

### Coil Resistance
- 23-30 awg, ±5% tolerance
- 31-33 awg, ±10% tolerance

### Starting Torque
- Gross torque values are shown. For net starting torque, subtract return spring torque.

### Return Spring Torque
- 0.75 pound-inches ±20%

### Weight
- 2.25 lb (1.020 kgs)

### Dimensions
- See page D36

### All specifications subject to change without notice.

---

1. Continuously pulsed at stated watts and duty cycle.
2. Single pulse at stated watts (with coil at ambient room temperature 20°C).
3. Other coil awg sizes available, consult factory.
4. Reference number of turns.
**Ledex® Rotary Solenoids**

**7S Dimensions**

**Inches (mm)**

**Armature Cover Configuration — Armature End Shaft**

**Armature Cover Configuration — Base End Shaft**

**Armature Cover Configuration — Double Shaft**

**Notes:**

1) All configurations have 10" (254 mm) minimum leads, 24 awg. PVC insulation.

2) For electrical specs and performance charts, see pages D26-D27.

All specifications subject to change without notice.

---

**No Shaft**

3 holes equally spaced located 1/2 rotary stroke 13° to left of center for R.H. stroke, right of center for L.H. stroke. 10-32 thread

**Base End Shaft**

3 holes equally spaced located 1/2 rotary stroke 13° to left of center for R.H. stroke, right of center for L.H. stroke. 10-32 thread

---

**Armature End Shaft**

3 holes equally spaced located 1/2 rotary stroke 13° to left of center for R.H. stroke, right of center for L.H. stroke. 10-32 thread

---

**Double Shaft**

3 holes equally spaced located 1/2 rotary stroke 13° to left of center for R.H. stroke, right of center for L.H. stroke. 10-32 thread
